

Palm Tree Plant Parts

This is a CANARY ISLAND DATE PALM

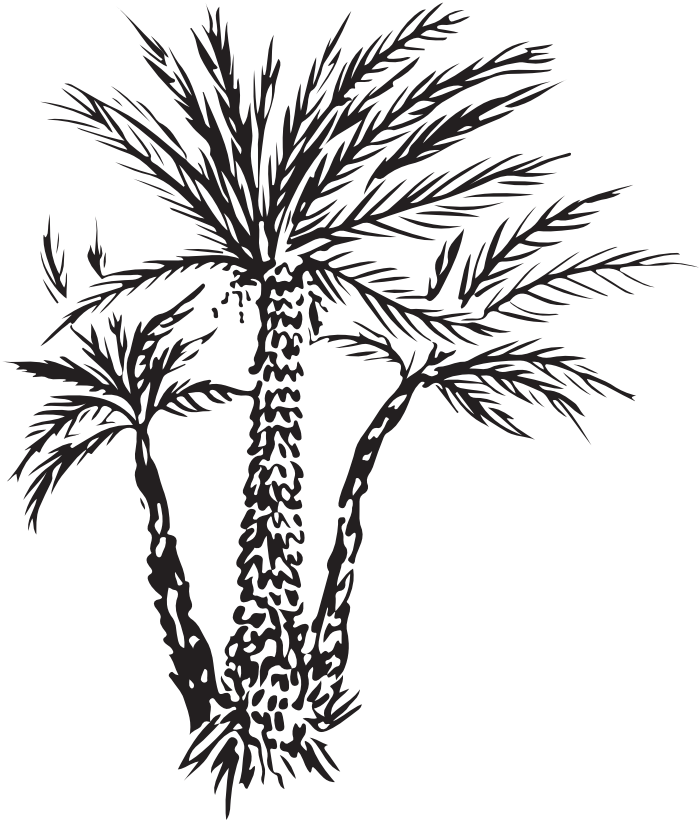

These trees grow on the Canary Islands.

Things to do:

- Can you find these two types of palm trees?
- What looks the same?
- What looks different?

This is a CRETAN DATE PALM

This type of tree can have a few small trunks.
These trees grow in Europe around the Mediterranean Sea in Turkey and Crete.

Name: _____

Find your favourite palm tree.
Draw the tree here.
Can you name the plant parts?

What do palm trees need?

- Palm trees use water in the air and the soil to help them grow.
- Palm trees like to have lots of sunlight and warm air.
- Palm trees find nutrients in the soil with their roots. The trunk brings the nutrients and water to the whole plant. This helps them grow and stay strong.
- Palm trees need time and space to grow big.
